-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

Claims 1-16 are objected to because of the following informalities: In each of the independent claims, the second occurrence of "a stop" is a double inclusion and should be described differently from the previously claimed stop. For example "first stop" and "second stop". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Alton (US 422,361). Alton discloses a slide nut comprising a nut body (N) having a first bore (not labeled) for receiving a threaded rod (S); a second transverse bore (not labeled) extending inwardly from an outer surface to terminate at an end surface; a stop (at M) separating an intermediate and first segment of the transverse bore; a thumb piece (T) having actuator and operator segments separated by another stop (at G); the actuator segment being disposed in the intermediate segment and including an elongated aperture in registry with the first bore extending from a first end to proximate the operator segment and having a thread segment for selective engagement with the threaded rod and; a spring (W) is provided in the intermediate segment between the

end surface and thumb piece to bias the thumb piece away from the end surface wherein the stops limit radial the thumb piece when not engaged with the threaded rod.

Allowable Subject Matter

Claims 1-15 would be allowable if rewritten or amended to overcome the claim objections, set forth in this Office action. In the context of the invention as claimed, the prior art does not disclose a plug mounted in the second end of the transverse bore.

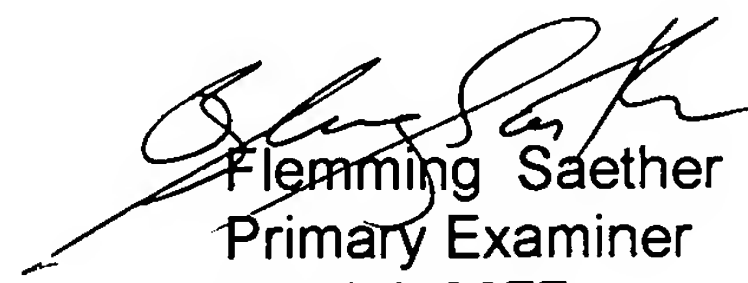

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
